

## Prototyping Changes

- The top of the mouse needs to be extended out forward (about 2 mm)
- The right side of the mouse needs to be indented a little to accommodate for the ring finger sitting on the side (about 1 mm)
- I accidentally took off the finger on the underside of the top of the mouse, so I just need to make sure to not take that off
- The palm area on the top of the mouse should be moved up a tad (about 2 mm) as there was a gap between my hand and the mouse
